

**Black Swamp Bird Observatory
Navarre, Ottawa NWR Banding Station
Spring 2024**

The 33rd spring season began daily 1 April at the primary passerine banding station of the Black Swamp Bird Observatory. Operations are conducted daily weather permitting from mid-April to early June. Only raw data (i.e., uncorrected for effort) are presented here, all these data should be considered provisional. They are presented here for general interest, not as scientific analyses.

Due to Covid-19 the station was not run in 2020 and 2021.

Bird Movement: The first week of field work has seen a wide variety of weather with considerable rain and northeast winds. Hence, a slow start to the spring season.

Returns: Each year we recover 200-300 banded birds returning from previous years. Returns so far for 2024:

Species summary for the Navarre banding station, spring 2024. Includes first/last capture, peak capture, 2024 new banded total, 2023 total for the species, and the total, high year, and average for 1989-2023. The station began operation in 1981 but was not run daily until 1989.

Last date is only included if the species main migration has passed through the region.

2024 totals bold if surpassed year 2023 totals, blue if surpassed average, and red if record year

Updated last: April 29
